

ABSTRACT OF THE DISCLOSURE

A method and system for printing electronic document information from a wireless device is described. In one aspect, a wireless communication component is configured to receive electronic document information over a wireless connection.

- 5 A printer interface component is configured to communicate the electronic document information to a printing device for generating a hard copy document that is based on the electronic document information. A payment component controls the printing of documents by requiring the user to provide monetary payment prior to the hard copy documents being generated.
